

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

In the first part some more upward moves can develop again... A strong resistance is at 11.130. Above it you shouldn't consider short anymore. Only quick long trades for 40-50 pips profit.

Anyway, in the second part of the session if Dow manages to resist under 11.130 then some downward moves can appear.
