

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

**Today's Description**

With red arrows is presented our prediction for today!

The main picture for today's live session is an accumulation between 11.000 and 11.130. After a little downward move in the first part of the session DOW can recovery in the second one. But more downward moves can be expected especially in electronic session. Be attention at the level from 11.000. There we see a significant support but a break under it will represent a good opportunity to short the market more. A strong resistance is, exactly like yesterday, at 11.130.
