Our comments

This is our forecast for yesterday: *"In the first hours some upward moves can develop. We have little long signals which can move the market near our resistance from 11.130. After that expect to see again some downward moves. The sentiment can change and a fall of 50-75 points profit can be possible."* Perfect we'd say! We saw upward moves (so LONG for 60-70 pips profit) and some downward moves of exactly 50 pips.
