## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Exactly like we expected we saw strong declines during yesterday's session... two of our targets had been already hit (10.270 and 10.180). During today's live session we expect to see more downward moves especially when DOW will success to break our first support from 10.180... First resistance is now at 10.270. A strong one and a reversal point is at 10.360.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

*(Feedback: We saw some little downward moves to our targets from 10.360 and 10.270 exactly like we said!)*

For next two days look, again, for more downward moves... Good targets can be 10.270 – 10.180 and maybe even 10.000. Look to reverse those trades only if DOW manages to break and close above our first resistance from 10.520-10.570.
