Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we don't have any strong signals that can move the markets... Because of this some accumulations between 10.180 – 10.270 can be expected during today's live session...

Any break of the above levels can be a good indication to "go with the market" with 40-50 points target.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some downward moves to ALL our targets from 10.360, 10.270, and 10.180 exactly like we said!)

From the next three days expect some low volatility, possible some accumulation days... The little interval to accumulate in is between 10.180 – 10.270... The bigger one is between 10.075 – 10.360. So, expect some little downward and upward moves in this zone... Trade in concordance!
