

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

Again we are in an accumulation zone between 10.650 and 10.750. In this zone look for some quick trades near support and resistance. A break of these levels can indicate further more moves in the same directions! Go with the market! During second part of the session we can expect for some little downward moves too.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some downward moves to 10.520, exactly like we said!)

For next days it seems that DOW is again in an upward trend. Because of this we can consider long trades above the level from 10.570. Possible targets can be 10.750 - 10.830 and maybe 10.950. Reverse and sell under 10.570!
