

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

It's a hard day to make a forecast... The equilibrium is very fragile and for today nothing special appears on the sky... Because of this we see a strong "indecision zone" between 10.070 and 10.030. Between this levels Dow can evolve and will try to decide what should do... After a break of any of these levels a move of 50-100 pips can develop. A rising above 10.110 is again a bullish indication. Support zone is between 9.950 and 9.900.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Like we said, Dow managed to retest our resistance from 10.110 and retreat instantly after that...

After a second unsuccessful tentative to break 10.110, now Dow is retreating back to our support zone! Try to trade in this direction.
