

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

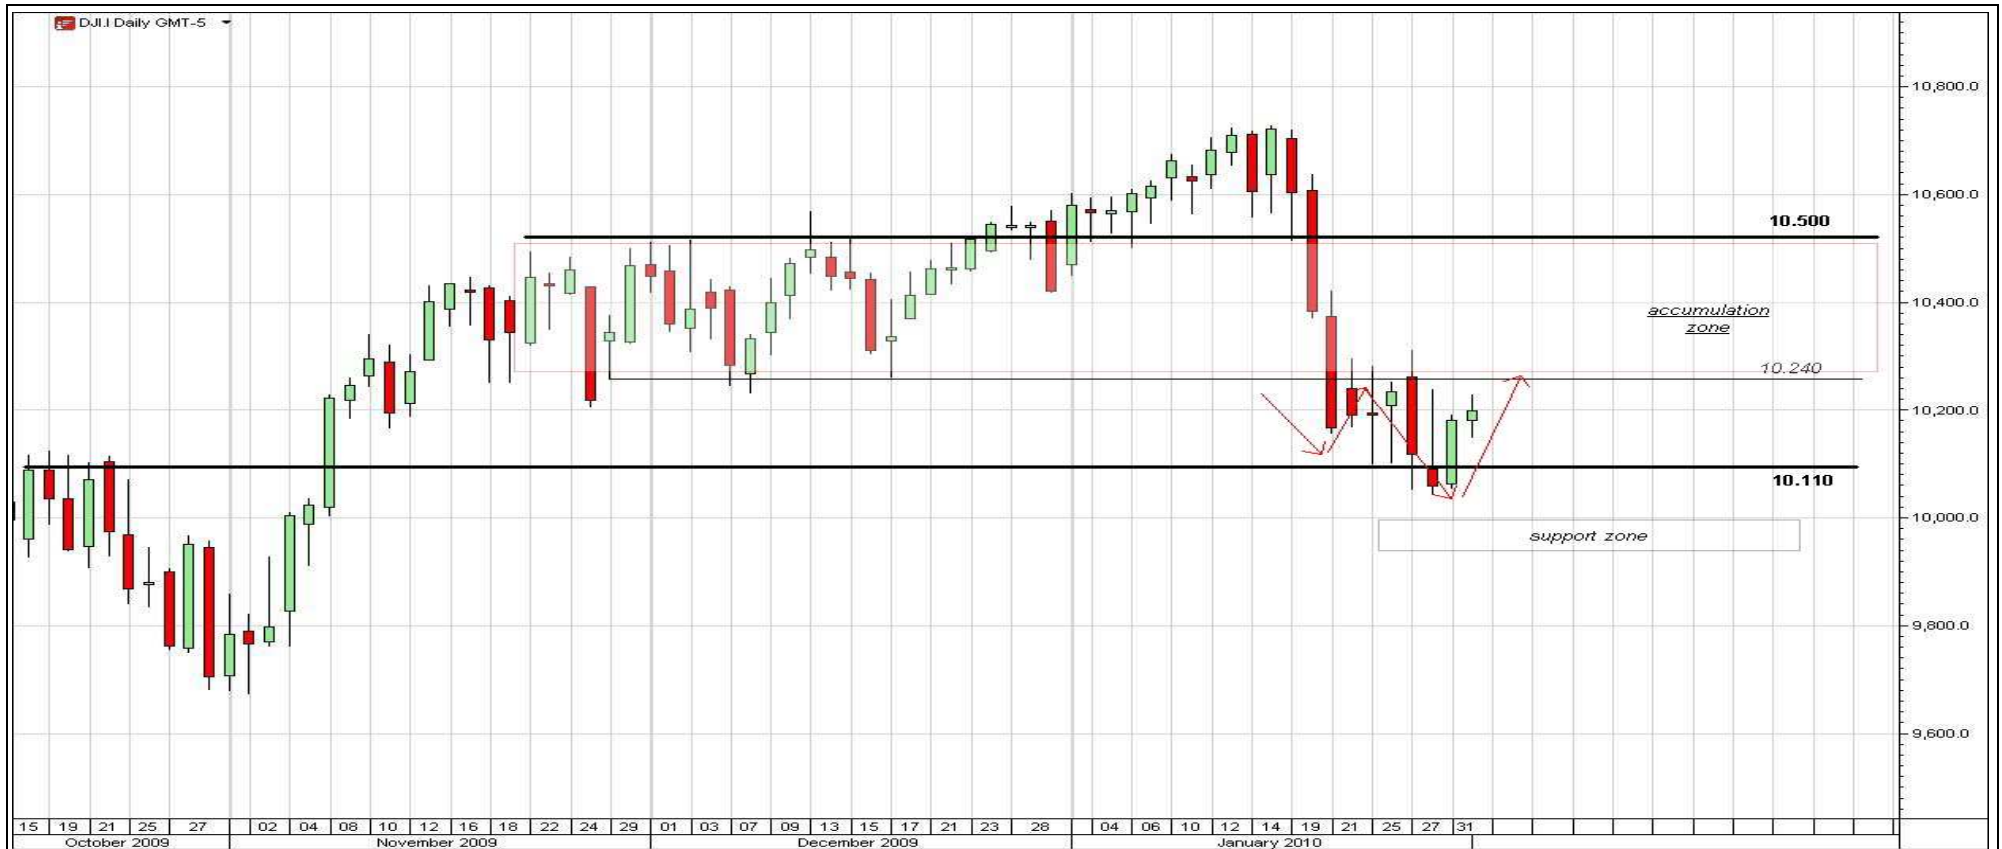

**Today's Description**

With red arrows is presented our prediction for today!

During first part of the session some little declines can appear but look for some upward moves too later in the session. For today we have a strong support near 10.110 and a resistance at 10.240 (and then 10.290). Any break of 10.240 is a good opportunity to buy more for the next resistance. Consider short only if breaks under 10.110.
