

## Our prediction:

## What really happened:

### Our comments

We wrote yesterday: *"For today's session look for some little upward moves in the first part but expect downward moves again after that (especially during electronic session)."* Like you saw, this really happened... An upward move to our resistance and a downward move in electronic session back to 10.300 and more... LONG for 50 pips profit and SHORT for another 50 pips...
