

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

More downward moves are to be expected for today... Like we said yesterday, downward moves in electronic session had been expected. First support (and first target) is near 10.240. Next one is almost at 10.110. During today's live session, beside the downward moves, look for some little upward move in the middle of the session. We have some long signals there.
