

## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Today, between 10.240 and 10.290 is "indecision zone". Dow will try to retest the resistance touched yesterday and maybe to break it. But if it will not succeed then look again for downward moves. Under 10.240 we have "Short area". Under this level look for some short trades. During second part of the day and especially during electronic session expect some downward moves.
