

**Our prediction:**

**What really happened:**

**Our comments**

We wrote yesterday: "After a zigzag market with little tentative to go down, we should see an upward market to our resistances and maybe more..." Like you saw, Dow's evolution was exactly like we anticipated... On live signals we even sent an update to close the trade on 10.130 (at the high of the day)... Anyway, at least +50 pips profit for yesterday's live session.
