

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

After a zigzag market with little tentative to go down, we should see an upward market to our resistances and maybe more...

First targets are at 10.070 and 10.110.

For today we see a strong support zone between 9.950 and 9.900. Only a break under it will represent a good opportunity to short the market again.
