## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Expect to see some rising volatility for today's trading session. Again, the area where Dow can evolve should be between 10.610 and 10.500... Any break of the resistance will represent a very good opportunity to enter LONG for 40-50 pips profit.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.500. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. Now Dow is trying to break the resistance level and heading to our first target...**Our first resistance had been touched! Now look for a break of this resistance. If Dow does it then you should look for second target (10.810).**
