

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

**Today's Description**

With red arrows is presented our prediction for today!

For today 10.560 seems to be a significant support (pivot)... During today's live session look for some downward moves again to 10.560 and then to 10.500. Only a break of 10.640 will represent a good reason to close the trade and to consider quick LONG trades for 40-50 pips...

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

With red arrows is presented our prediction for next days!

After a rise to 10.730 (two times it hit this level and couldn't pass it) Dow is in a downward move right now...

It already touched 10.500 (like we said) and now is trying again to reach it... A fall under it will represent that Dow will enter again in our past accumulation zone.
