Between 10.110 (a very strong support) and 10.240 (first resistance) should evolve today Dow. Look for up and down moves in this interval. Any break of the support is a good opportunity to sell with 40-50 pips target.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now Dow is in our accumulation zone (10.500 – 10.110), so expect for up and down move in this zone... It already tested the support and pulled back very fast. A recovery from here should be expected.

If breaks under 10.110 look again for some short moves.
