

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For the first part of the session we expect some upward moves. A good resistance zone (so a good target) should be around 10.240-10.270. After that, again some downward moves can develop.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now Dow is in our accumulation zone (10.500 – 10.110), so expect for up and down move in this zone... It already tested the support and pulled back very fast. A recovery from here should be expected.

If breaks under 10.110 look again for some short moves.
