

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we see some sort of resistance at 10.310. Pivot line is at 10.240 and around it we should see some develops for today... After some little tentative to grow in the first part of the session we have good signs for a downward market in the last part of the day and in electronic session. There are possibilities to see again 10.160 touched.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now Dow is in our accumulation zone (10.500 – 10.110), so expect for up and down move in this zone... It already tested the support and pulled back very fast. A recovery from here should be expected.

If breaks under 10.110 look again for some short moves.
