Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some upward moves during last 2 days...)

Now, the next resistance and target is 10.270...During the next days you should be very careful at the level from 10.000! You should try LONG trades above it but use a stop loss under it (and consider reversing if close under!)... First good targets are 10.270 and 10.360.
