Today's Description

With red arrows is presented our prediction for today!

For today's live session expect to see some interesting fluctuation near our pivot line from 10.360... In the morning some downward moves can appear and can move the DOW under this level... In the afternoon some possible recoveries back are to be expected... Next significant resistance and target can be 10.450.

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some upward moves during last 2 days...)

Now, the next resistance and target is 10.270...During the next days you should be very careful at the level from 10.000! You should try LONG trades above it but use a stop loss under it (and consider reversing if close under!)... First good targets are 10.270 and 10.360.
