## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

For today's morning and latter in the day we have some short signals....only in between (11:00 – 14:00) DOW can try to recover a little beat... The signals are not very big so look to short the market only under our support from 10.360 with stop loss above the high (10.420-10.430). Reverse and try long trades if goes above this level (10.430).

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: Both our target had been hit!)

For the next two days we believe that it's possible to appear in this zone an inflexion point... Dow can move down from here a little bit. 10.260 – 10.180 can be good targets. Consider reversing only if DOW manages to break the last high (around 10.540).
