Today's Description

With red arrows is presented our prediction for today!

Again, we have some short signals for today! Look for downward moves during today's live session. Use stop losses above yesterday's high (10.420-10.430) and 10.270-10.180 targets.

If DOW manages to come back then consider reversing for some quick long trades...

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: Both our target had been hit!)

For the next two days we believe that it's possible to appear in this zone an inflexion point... Dow can move down from here a little bit. 10.260 – 10.180 can be good targets. Consider reversing only if DOW manages to break the last high (around 10.540).
