

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

Exactly like we expected we saw strong declines during Friday's live session. Now, DOW is under our resistance from 10.180 and, for today, we can expect to see some swing moves, between 10.080 and 10.180...

A break of any of these levels is a good opportunity to "trade with the market"...

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: DOW moved down exactly like we forecasted!!! Again, both our target had been hit!!!)

For the next days we are expecting some swing moves between 10.000 and 10.360...Look to buy near support and sell near resistance. Also be very careful at 10.000. A break under it is an opportunity to sell the market.
