## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Difficult day to anticipate... Apparently we don't have any important signals, but news were very powerful and they can move all the markets significantly...

For today look for some fluctuations between 9.640 – 9.760 with more possibilities to go down... Also, be prepared for a break out trade (LONG trade) if Dow manages to go above 9.800 (with 40-50 points profit target).

*Time Frame: DAY*

**Today's Description**

With red arrows is presented our prediction for next days!

*(Feedback: We saw a local top near 10.600 and declines after that, exactly like we forecasted!)*

**For the next days the general sentiment is still negative... A little recovery is possible for the next two days but from the next week the bear market should reappear...**
