## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Our yesterday's levels of support and resistance had been respected perfectly during live session... Because of this, today we should have a little resistance at 10.080 and a more solid one at 10.180. Strong support is at 10.000! During live session we can expect to see some tentative to break the support from 10.000... The main scenario is that DOW will not succeed and we will see some accumulation above 10.000... But be very careful at this level... A break under it is a good opportunity to sell the markets with 60-75 points target...

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

With red arrows is presented our prediction for next days!

*(Feedback: DOW moved down exactly like we forecasted!!! Again, both our target had been hit!!!)*

For the next days we are expecting some swing moves between 10.000 and 10.360...Look to buy near support and sell near resistance. Also be very careful at 10.000. A break under it is an opportunity to sell the market.
