## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

For today we are back to our resistance from 10.270...Our swings moves between 10.200 -10.360 are working fine... During live session look for some fluctuations near this level... some upward moves in the first part and possible downward moves (to 10.200) in the afternoon and in electronic session.

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

With red arrows is presented our prediction for next days!

*(Feedback: DOW moved down exactly like we forecasted!!! Again, both our target had been hit!!!)*

For the next days we are expecting some swing moves between 10.000 and 10.360...Look to buy near support and sell near resistance. Also be very careful at 10.000. A break under it is an opportunity to sell the market.
