We wrote yesterday: *“Again some positive moves should develop during today’s live session – especially during first part of it... Now we are near a strong resistance from 10.360 but, a break above it will represent a good opportunity to “go with the market”... Strong support and a good place to set a stop loss is under 10.270.”* **AGAIN, PERFECT FORECAST WITH LIVE SIGNAL! +100 POINTS PROFIT!**
