

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we don't have any significant signal for the markets... Because of this, DOW can evolve near our "indecision zone" between 10.520 – 10.570 with occasionally tentative to break either the support or resistance. During electronic session (after hours) look for some downward moves...

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw little upward moves to our resistance from 10.570)

Now we are exactly at our strong resistance from 10.570...The main expectation is for some downward moves from here but you should be very careful at this level... A break and a candle closed above it can indicate some more upward moves...
