

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

DOW should manage to stay above our significant support from 10.000. Look for some quick long trades with stop loss under this level. Next significant resistance and also target can be 10.180.

A break under 10.000 will represent a signal to short the markets again with at least 100 points target.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some upward moves during last 2 days...)

The positive sentiment moved the markets even upper than we expected (above 10.000). Now, the next resistance and target is 10.260...During the next days you should be very careful at the level from 10.000! You should try LONG trades above it but use a stop loss under it (and consider reversing if close under!)...
