Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

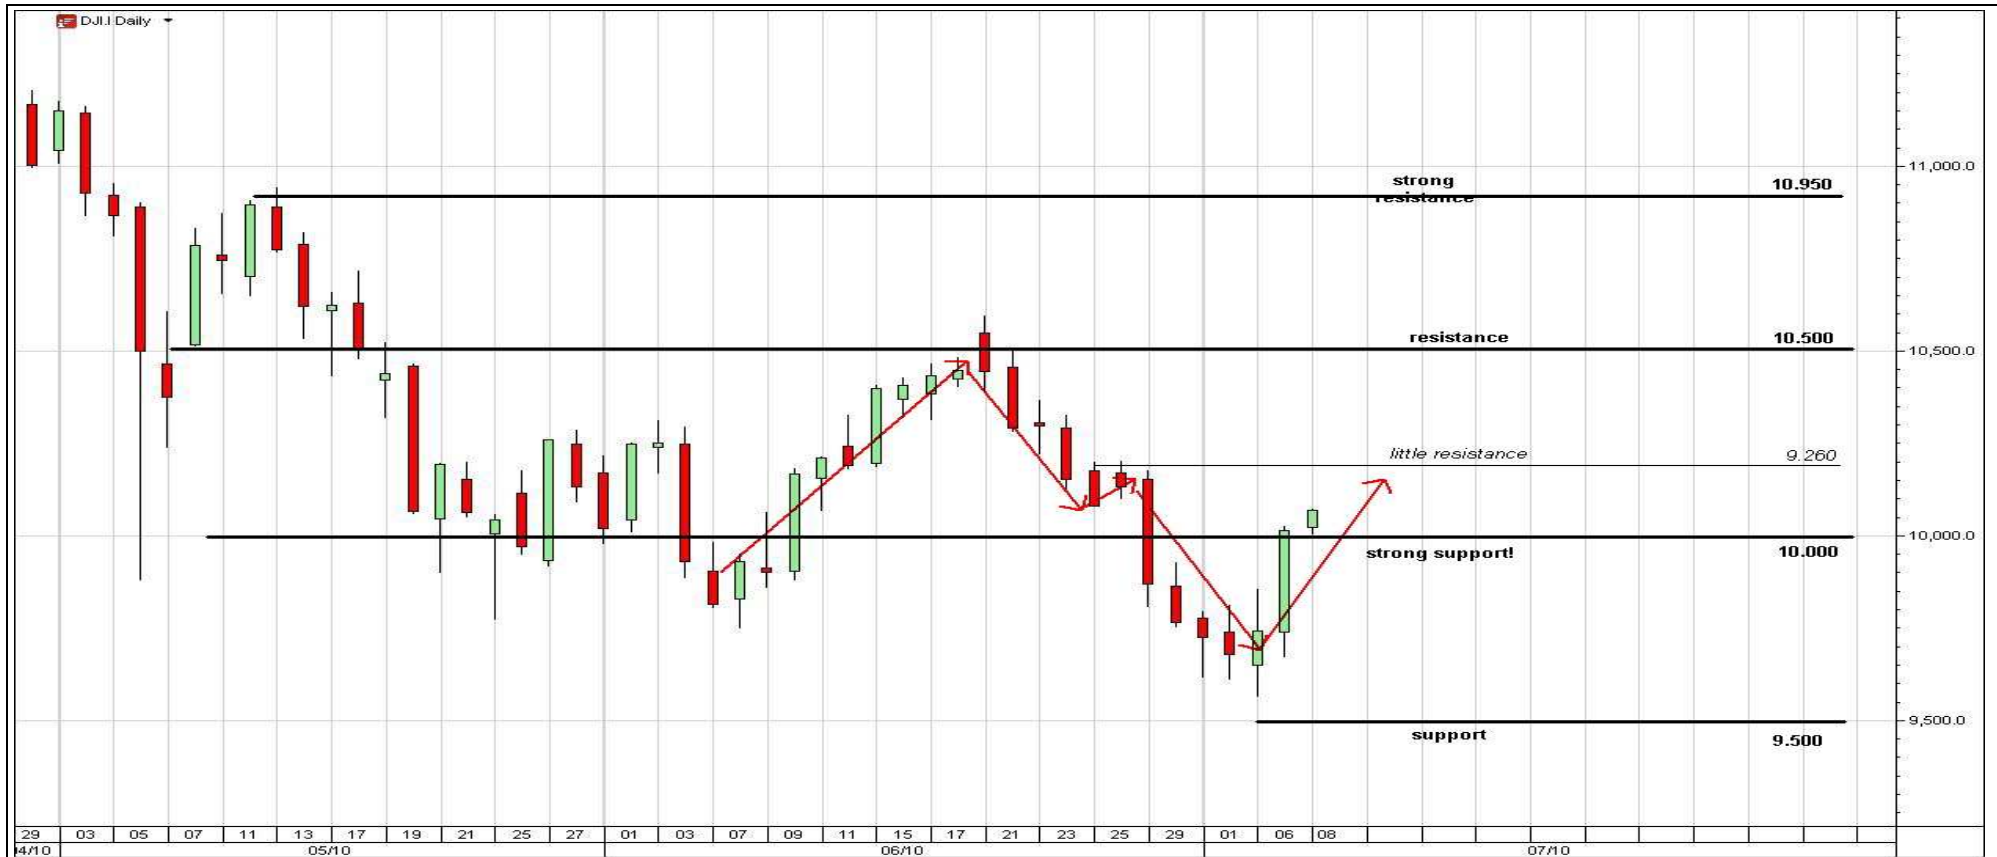

Today's Description

With red arrows is presented our prediction for today!

Now we are in a range between 10.000 and 10.180. Both levels had been retested in the past and are very solid.. during today's live session we see some negative signs in the first part of the day and a possible recovery after that. Also, look to buy more if DOW manages to break our resistance from 10.180.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw some upward moves during last 2 days...)

The positive sentiment moved the markets even upper than we expected (above 10.000). Now, the next resistance and target is 10.260...During the next days you should be very careful at the level from 10.000! You should try LONG trades above it but use a stop loss under it (and consider reversing if close under!)...
