## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Now we are near a strong support level from 10.000 points. For the first part of the session we should see some recovery above this level. After that the downward moves can resume. A break under 10.000 level is an invitation to short the market with a target near next support from 9.840.

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

With red arrows is presented our prediction for next days!

*(Feedback: During last week we saw, exactly like we expected, some accumulation between 10.000 and 10.200 )*

**During this week some upward moves above 10.270 are possible... Strong resistances are at 10.270 and 10.500. More downward moves after that are still to be expected!**
