

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

During first part of the today's live session we can expect to see some downward moves. Look for a support near 10.270... After that, it's possible to see a recovery back to our resistance from 10.370.

Any break of these two levels can indicate a good opportunity to "go with the market" for 40-50 points profit.
