

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today again we see a significant resistance at 10.180. Under it Dow should evolve for today with some unsuccessful tentative to break it... (Consider reversing only above 10.200 for 40-50 points profit).

First support is at 10.060, next one (and a significant one) is at 10.000.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw a local top near 10.600 and declines after that, exactly like we forecasted!)

For the next days we should expect to see little recovery to our support from 10.270 followed by another downward move possible to 10.000 and more.
