

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

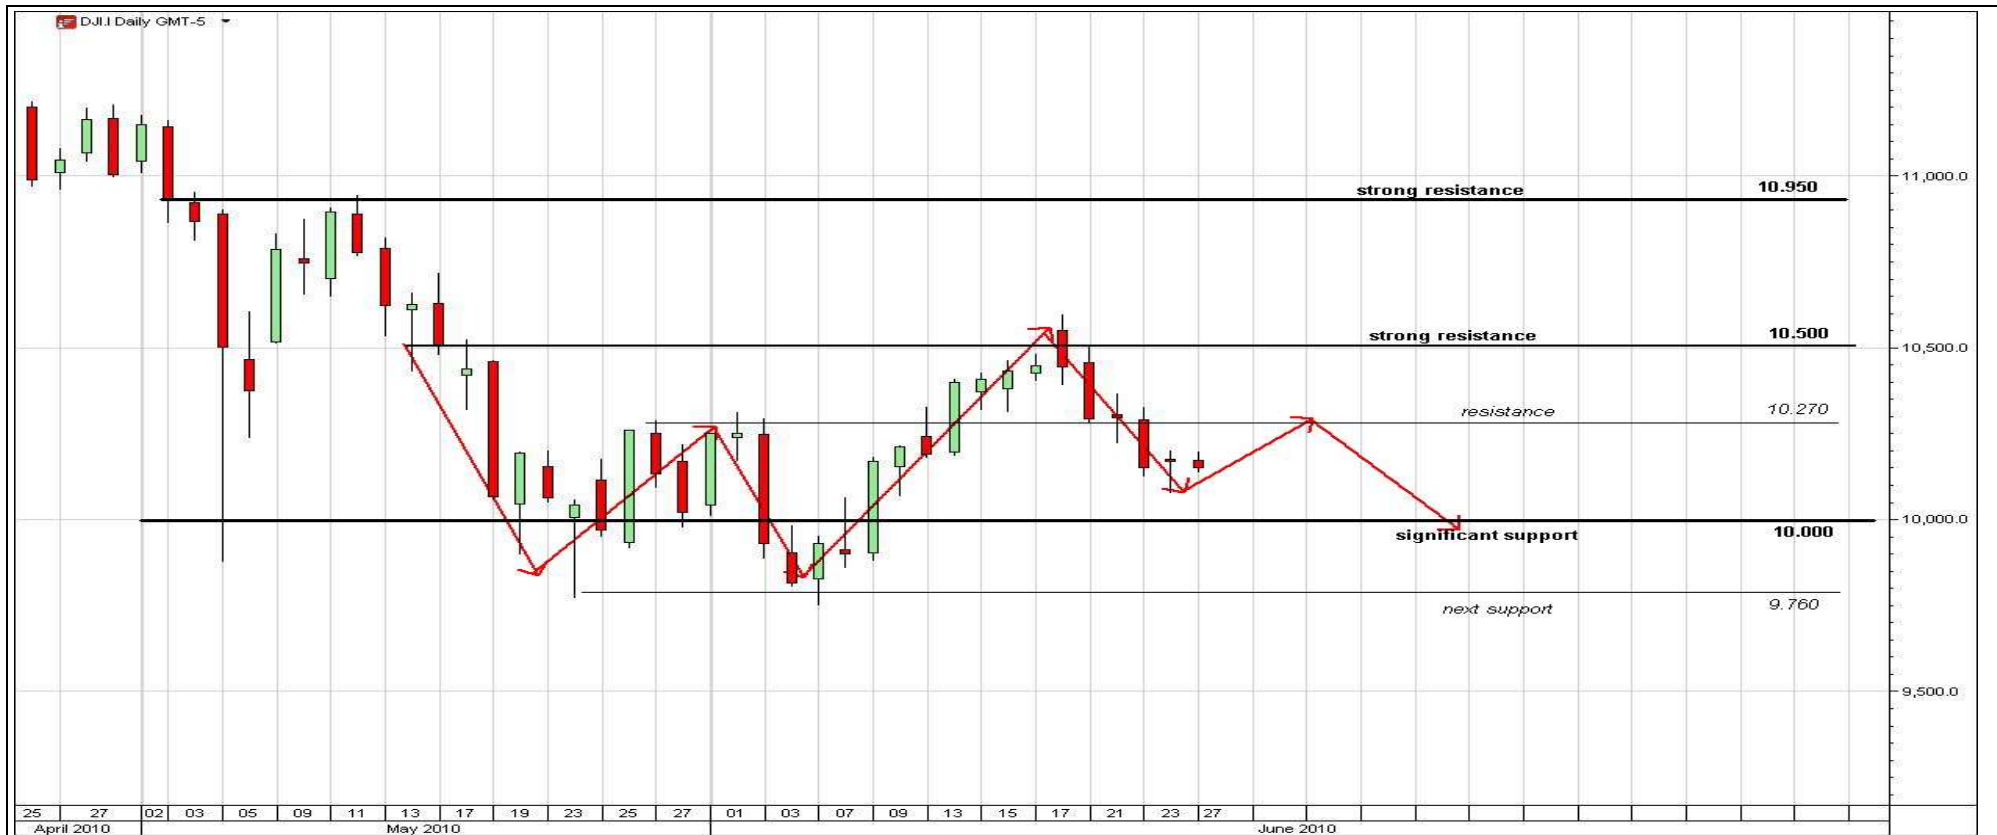

Today's Description

With red arrows is presented our prediction for today!

Our level from 10.180 managed to hold the market yesterday...Now, Dow is significantly lower, our targets from 10.060 and 10.000 had been already hit! During today's live session expect to see a little recovery in the first part but more downward moves (very possible under 10.000) should develop after that...

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw a local top near 10.600 and declines after that, exactly like we forecasted!)

For the next days we should expect to see little recovery to our support from 10.270 followed by another downward move possible to 10.000 and more.
