Today's Description

With red arrows is presented our prediction for today!

After a little slow market in the morning we should see more upward moves later in the session. A strong pivot line for today is 10.270. A break above this level will give a free way to our next resistance from 10.380. Support for today is at 10.180 and only under it you should reconsider short trades.

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: During last week we saw, exactly like we expected, some accumulation between 10,000 and 10,200)

During this week some upward moves above 10,270 are possible... Strong resistances are at 10,270 and 10,500. More downward moves after that are still to be expected!
