Time Frame: 30 minutes

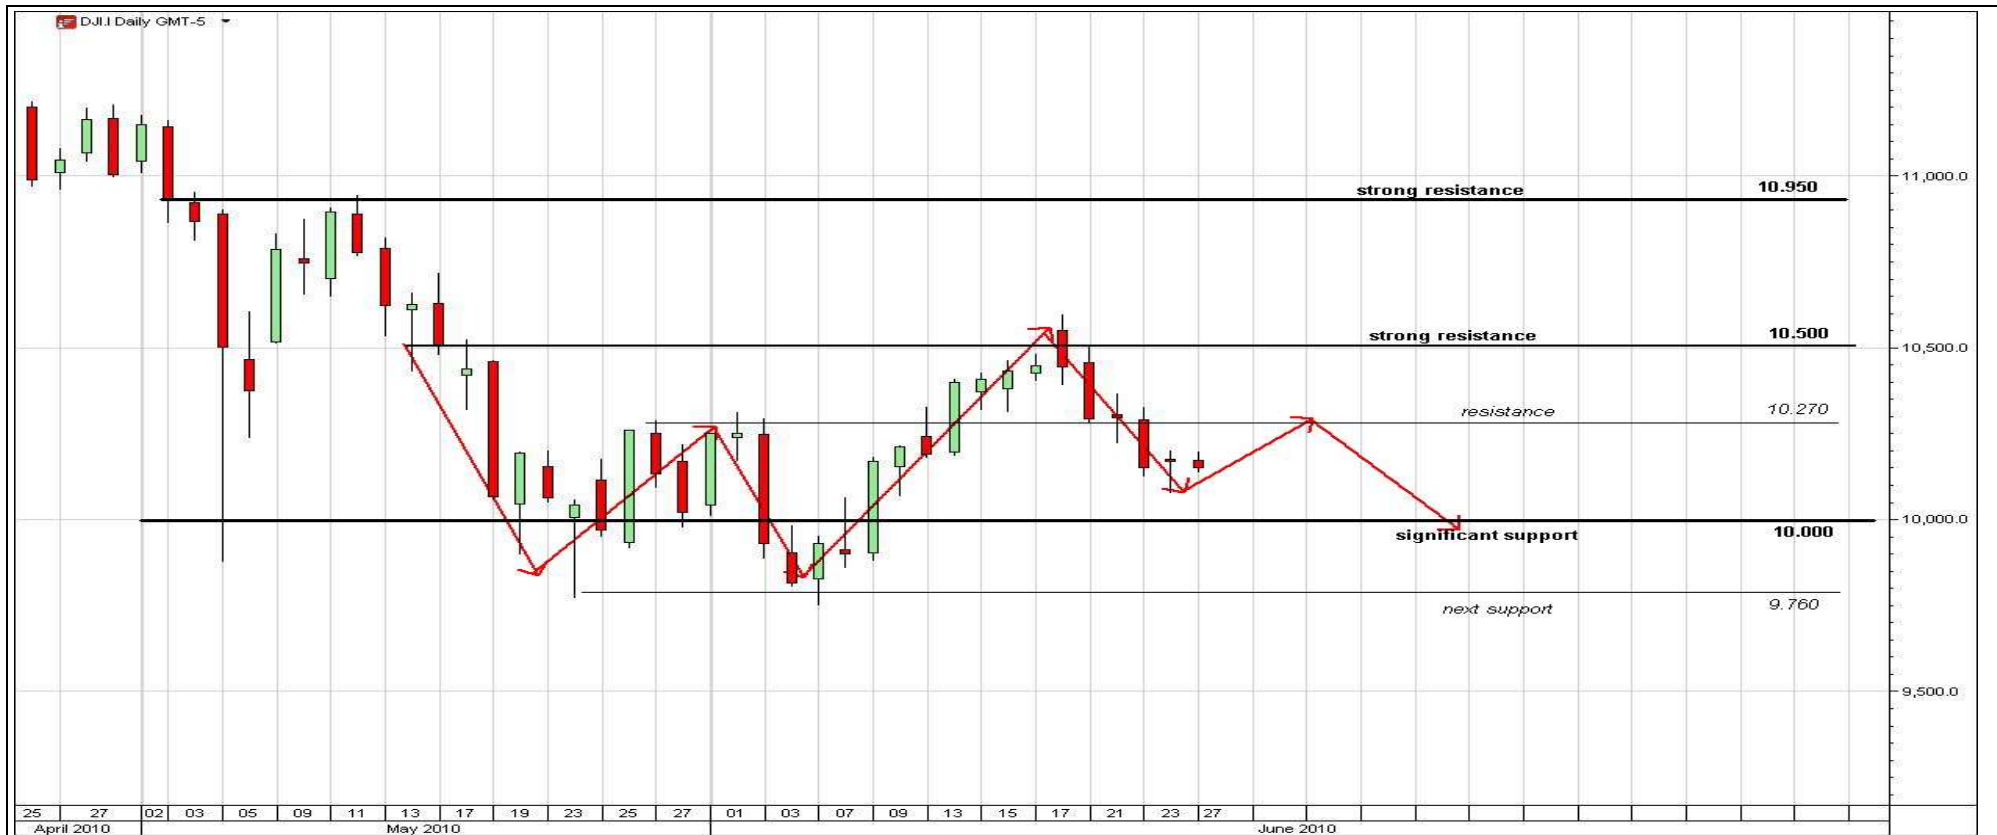

Today's Description

With red arrows is presented our prediction for today!

Our level from 10.000 had been brooked! Now, it is a strong resistance and only above it you should reconsider long trades! For today's live session we can see further downward moves... Now we are near our support from 10.850. Next significant support and target is at 9.760

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: We saw a local top near 10.600 and declines after that, exactly like we forecasted!)

For the next days we should expect to see little recovery to our support from 10.270 followed by another downward move possible to 10.000 and more.
