

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we have significant short signals. Because of this expect to see more downward moves under 10.000 (good target can be 9.840). A close SL should be put above 10.000-10.050 because a break above this level will give a little hope to the traders.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: During last week we saw, exactly like we expected, some accumulation between 10.000 and 10.200)

For the next days expect to see a significant rise of the volatility! If during Monday more downward moves can develop, Tuesday strong recovery should appear... After that again downward moves can manifest.
