## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

Now we are near a strong resistance from 10.730... Dow will try during today's live session to break it for several times. Because during second part of the session we expect some downward moves too, it's possible that Dow will not succeed to break today's resistance. Anyway be ready to buy more if manages to break and close above 10.730. Next good target is 10.830! Support is at 10.640 and only under it you should reconsider little short trades.

## Dow Jones Industrial Average (DJI)

Time Frame: DAY

### Today's Description

With red arrows is presented our prediction for next days!

It seems that those little downward moves to 10.500 were our expected decline...

For now on the sentiment is strong bullish and we can see 10.730 touched. After that, next good resistance (target) is at 10.830! Expect to see little retreat from 10.730 but in the end a break above it should develop...
