

Our prediction:

What really happened:

Our comments

We wrote yesterday: "Dow will try during today's live session to break it for several times. Because during second part of the session we expect some downward moves too, it's possible that Dow will not succeed to break today's resistance." Like you can see Dow "followed" our expectations perfectly... A LONG for 50 pips profit and a SHORT for another 40-50 pips profit...
