Today's Description

With red arrows is presented our prediction for today!

For today's session expect to see some upward moves to our resistance and some consolidation after that... 10.830 should be a resistance and first target for near future. Next strong resistance is at 10.950... 10.730 is a strong support from now on... Only under it reconsider shorting the market.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

It seems that those little downward moves to 10.500 were our expected decline...

For now on the sentiment is strong bullish and we can see 10.730 touched. After that, next good resistance (target) is at 10.830! Expect to see little retreat from 10.730 but in the end a break above it should develop...
