

## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

With red arrows is presented our prediction for today!

10.670 can be for today some sort of pivot line. Under it, Dow can evolve with some little tentative to break it. Above this line consider some quick LONG trades for 50-60 pips profit. Under it more downward moves to 10.400 are very possible!

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

**Today's Description**

With red arrows is presented our prediction for next days!

*Dow missed only with 3 pips our target from 10.950 and then fell, exactly like we expected!*  
**Fort he next days we can see some downward moves under 10.950. First support is at 10.670, second one is at 10.400. Consider reversing this position only if Dow manages to break and close the day above 10.950.**
