Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

For today we don't have signs for a significant move of the markets. Because of this we can expect to see some accumulation near 10.200 level. A strong resistance is at 10.400 and Dow should find there a significant obstacle to break. Under 10.200 is our "short area" where you can try quick short trades with 50-75 points target.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

(Feedback: From 10.950 we saw very strong declines, exactly like we looked for! All our targets from 10.670, 10.400, 10.000 and 9.850 had been hit!)

During next days the strong negative sentiment will not disappear. We can expect to see a little recovery back to 10.200-10.300 points but main direction is still down!
