

Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

**Today's Description**

With red arrows is presented our prediction for today!

Some high volatility for today... Some downward moves in the first part of the session, a recovery in the afternoon and again short in the end and during electronic session... 9.600 and 9.4500 are the limits for today... If Dow manages to break any of them then look for some quick trade to follow the market. If not sell near the top and buy near the bottom...
