

## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

### Today's Description

with red arrows is presented our prediction for today!

9.250 is a very strong resistance for today! Above this level consider only LONG trades with SL under it. Under it expect a fall under 9.170 for some SHORT. Between wait, is a neutral area. We already saw some upward moves for today but we still should see farther grows.

## Dow Jones Industrial Average (DJI)

*Time Frame: DAY*

### Today's Description

with red arrows is presented our prediction for next days!

*We said first target 9.170, second target 9.250. Both correct! We hope you managed to take some good profit!*

Now we should see some accumulation between 9.250-9.010. Be very careful when Dow manages to break any of this levels! Expect some good move after this for 2-300 pips at least... A good target above 9.250 is 9.410-9.450.
