## Dow Jones Industrial Average (DJI)

Time Frame: DAY

### Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. Now Dow retreats from support (10.220) and it is heading to resistance (10.450).
