Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. Now Dow is trying to break the resistance. Only a closed day above this resistance will determine futures grows. Next target is 10.610
