Dow Jones Industrial Average (DJI)

Time Frame: 30 minutes

Today's Description

With red arrows is presented our prediction for today!

Support zone for today should be 10.450-10.480. Very strong resistance is at 10.540. Dow should evolve between these limits with up and down moves like those described with red arrows. Any break under 10.390 is a very good opportunity to enter short.

Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.500. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. Now Dow is pulling back from resistance and it is heading to first support.
