Time Frame: 30 minutes

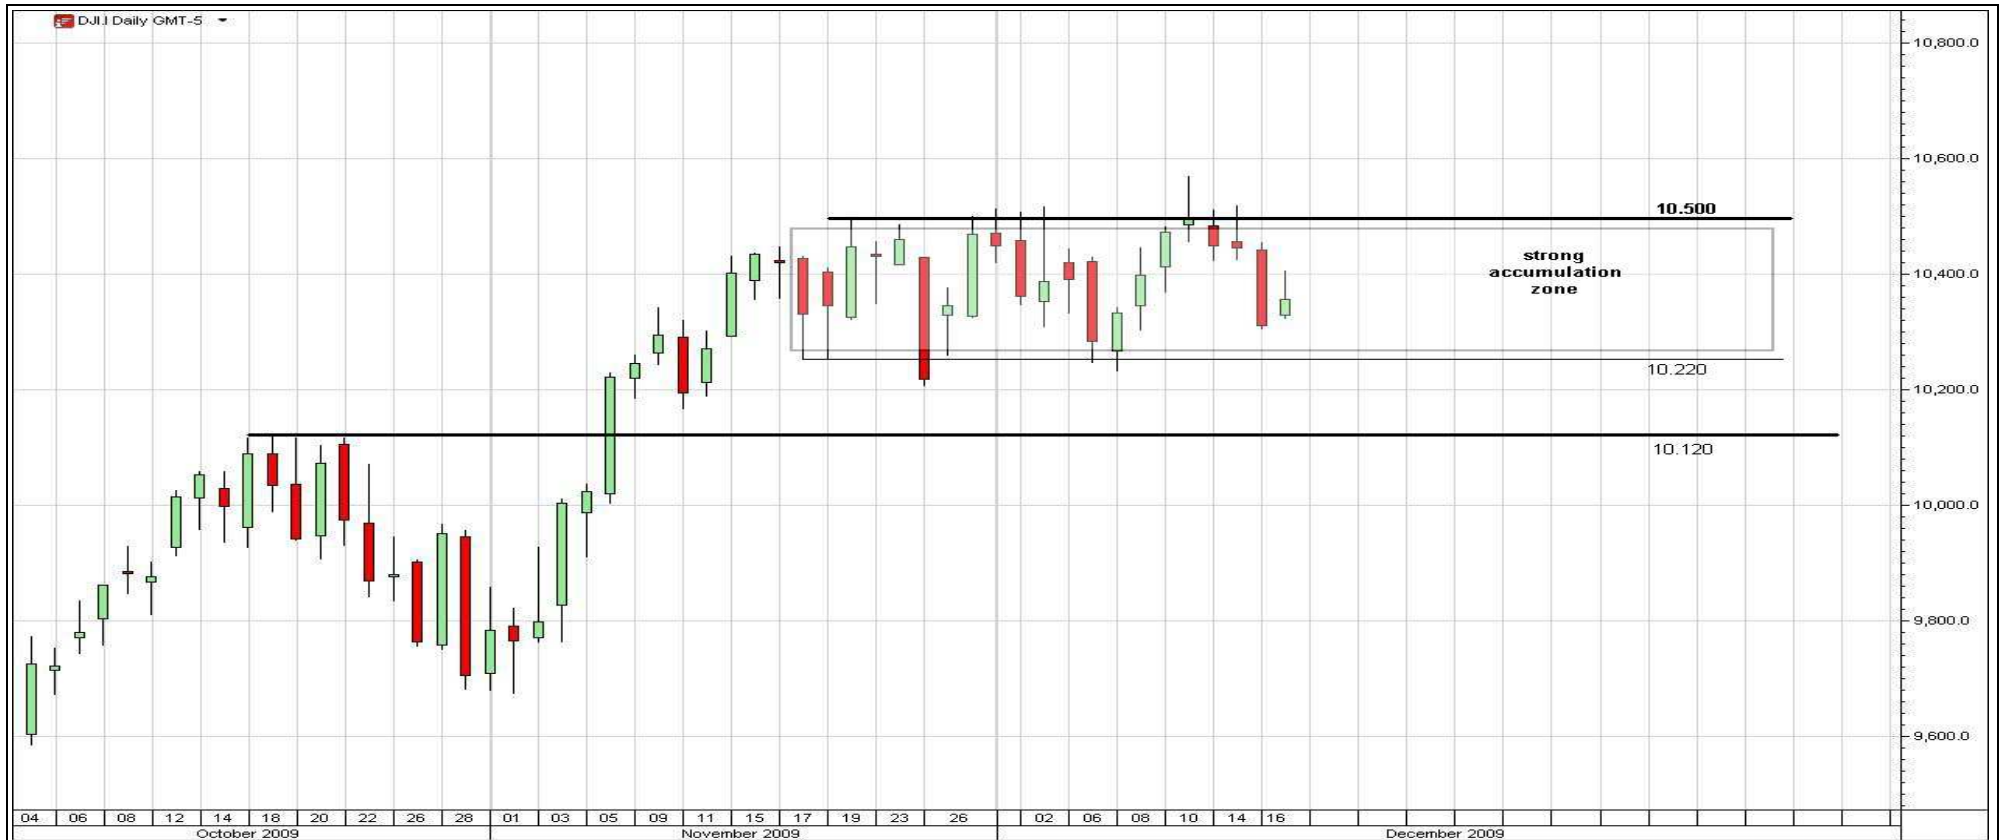

Today's Description

With red arrows is presented our prediction for today!

For today we have some short signals for the first part of the day... Dow can try again to break our support from 10,290. If it will succeed then look for 10,220 to be the next target. If not then some little pullbacks for the rest of the day are possible. 10,390 should be a strong resistance for today.

Today's Description

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.500. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade. **Now Dow is pulling back from resistance and it is heading to first support.**
