Dow Jones Industrial Average (DJI)

Time Frame: DAY

Today's Description

With red arrows is presented our prediction for next days!

Like we said some days ago, now we are in a consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade.
