

## Dow Jones Industrial Average (DJI)

*Time Frame: 30 minutes*

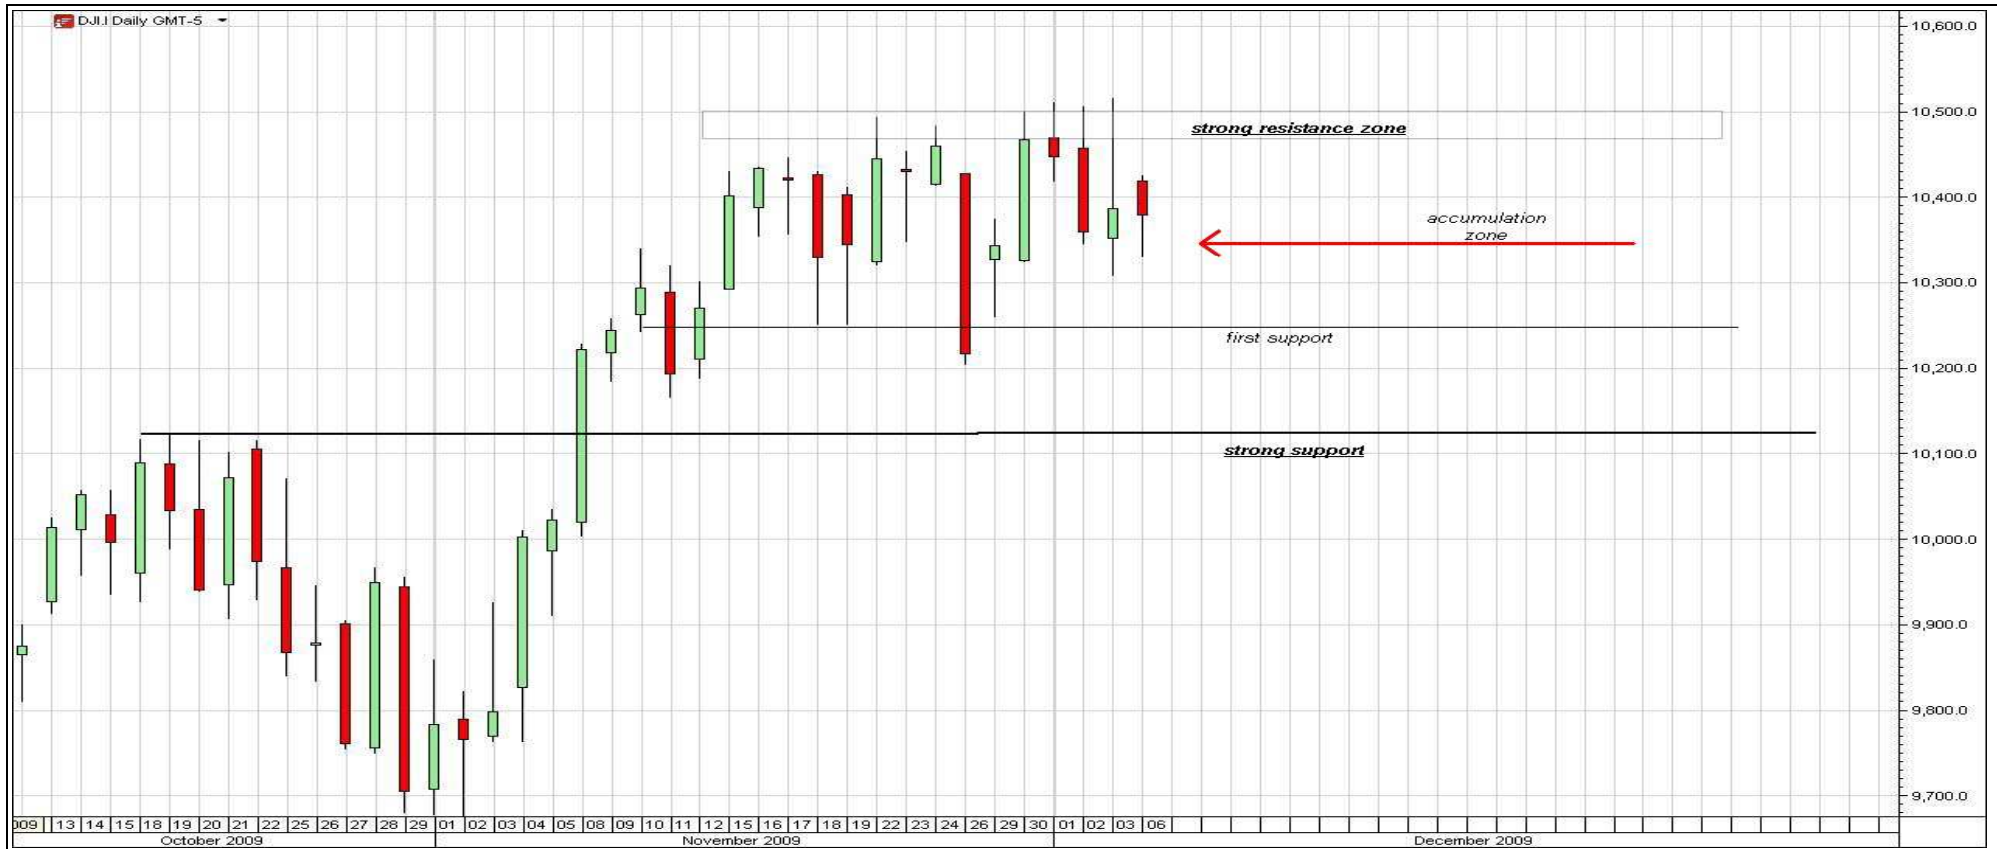

### Today's Description

With red arrows is presented our prediction for today!

During today's session consider a good pivot level at 10.390. Support is at 10.390 and resistance at 10.450-10.480. After a calm start with up and down moves between 10.400 and 10.350 expect to see some upward moves to our resistance, maybe more. Be careful at 10.290. Any break of this support will represent a good opportunity to short the market.

With red arrows is presented our prediction for next days!

Now we are in a strong consolidation zone between 10.120-10.480. Between these levels Dow makes up and down moves. Buy near support and sell near resistance and reverse only when Dow manages to break these levels for at least 50 pips. Only then try a break out trade.
